V2V Thematic Webinar Series 2021

CO-EXISTENCE OF LEGAL AND ILLEGAL SUPPLY CHAINS FOR MARINE FISHERIES

Tune in to hear insights on the border disparities and multidimensional poverty in Papua New Guinea and their effects on the marine biodiversity!

WHEN: Friday, March 26th, 2021

TIME: 8 PM UTC to 9:15 PM UTC

V2V Thematic Webinar Series 2021

CO-EXISTENCE OF LEGAL AND ILLEGAL SUPPLY CHAINS FOR MARINE FISHERIES

Border disparities and multidimensional poverty are characteristic of some areas in Papua New Guinea. In the remote and isolated area of the South Fly, high-value marine products (shark fin, beche de mer, fish bladders, and mud crabs) are illegally traded into a growing Asian market. Uncovering the characteristics of both the illegal value chains alongside legal ones, and finding out motivations for engagement in either one, is the first step towards sustainability.

SPEAKER BIO:

Dr. Ingrid van Putten is a senior researcher at CSIRO (Hobart, Australia) and the Centre for Marine Socioecology (University of Tasmania). As a behavioural economist, Ingrid tries to understand the behaviour of marine resource users and to find tractable ways to influence behaviour and reduce risks. Ingrid's ultimate aim is to improve the management and long-term viability of coupled marine social-ecological systems.
